

ANKIT KUMAR

Aspiring Data Analyst | AI-Enthusiast & Generative AI Developer

Chandigarh, India | 14ankitkumar14@gmail.com | +91 7986050683 |  

PROFESSIONAL SUMMARY

Detail-oriented and analytically driven Computer Science graduate with hands-on experience in Python, SQL, Power BI, and Excel through academic projects, complemented by growing expertise in Artificial Intelligence and Generative AI application development. Skilled in data cleaning, exploratory data analysis, dashboard development, and building AI-powered backend solutions using large language models. Adept at translating raw data into actionable business insights and integrating AI capabilities into practical, real-world applications. Seeking an entry-level Data Analyst role where strong analytical, visualization, and AI-driven problem-solving skills can add measurable value.

EDUCATION

Bachelor of Engineering (B.E.) in Computer Science

Chandigarh University | 2022 - 2026 | CGPA: 6.84

TECHNICAL SKILLS

Programming & Querying: Python, SQL, MySQL, PostgreSQL, Microsoft SQL Server, Google BigQuery

Data Analysis Libraries: Pandas, NumPy, Matplotlib, Seaborn, Jupyter Notebook

BI & Visualization Tools: Power BI, Tableau, DAX, Power Query, Dashboard Development, KPI Reporting

Excel: Advanced Excel, Pivot Tables, XLOOKUP, VLOOKUP, Power Pivot

AI & Generative AI: Groq LLM, Generative AI, Prompt Engineering, RAG (Retrieval-Augmented Generation), Pydantic, PyPDF

Backend & API Development: FastAPI, REST APIs, JSON, CORS

Core Competencies: Data Cleaning, Data Wrangling, EDA, Statistical Analysis, Data Modelling, ETL, Data Storytelling, Root Cause Analysis, Trend Analysis, Predictive Analytics, A/B Testing

Tools: Git, GitHub

PROJECTS

HireMe AI - Resume & Recruiter Assistant | Python, FastAPI, Groq LLM, Pydantic, PyPDF

- Built an AI-powered resume analysis backend that extracts candidate information from PDF resumes and generates structured recruiter-oriented responses.
- Developed REST APIs using FastAPI with PyPDF-based document parsing, Pydantic schema validation, and Groq LLM integration for candidate analysis and response generation.
- Implemented streaming responses and CORS handling to support efficient real-time API communication and integration with frontend applications.

Customer Shopping Behaviour Analysis | Python, SQL, Power BI, Excel

- Analyzed retail customer transaction data to identify purchasing patterns, customer segmentation, and seasonal sales trends.
- Developed an interactive Power BI dashboard with KPIs and dynamic visualizations for real-time business insights.
- Generated actionable recommendations for marketing campaigns, inventory optimization, and customer retention using data-driven analysis.

Credit Card Financial Dashboard | Power BI, SQL, Excel, DAX

- Built an interactive Power BI dashboard to analyze credit card transactions, customer behavior, and financial KPIs.
- Developed SQL queries, Power Query transformations, and DAX measures to create dynamic reports and business metrics.
- Identified revenue trends, top-performing customer segments, card category performance, and regional insights to support data-driven decision-making.

CERTIFICATIONS

- Introduction to Data Analysis Using Python — Google
- SQL: A Practical Introduction for Querying Databases — IBM (Coursera)
- Cloud Computing — Elite + Silver, NPTEL (IIT Kharagpur)

ACTIVITIES & EXTRACURRICULAR INVOLVEMENT

- Built a personal Power BI dashboard tracking college placement statistics, shared with peers for interview preparation insights.
- Active member, Data Science & Analytics Club — led peer workshops on Excel dashboards and SQL query optimization.
- Presented data-backed strategy recommendations using Power BI in an inter-college business case study competition.
- Regularly practice EDA, dashboard storytelling, and Generative AI application development to build real-world BI, KPI, and AI integration skills.
